

# Explore Measuring Guide

### IT'S EASY

Our Measuring Guide is very easy to use! It will help you collect the basic information needed for our team to begin the process of designing your new kitchen or bath. This does not have to be a work of art - it simply needs to be a clear and accurate drawing of your space. Feel free to use the attached graph paper. Otherwise you can use any paper. Remember, we're here to help! Please call **703-962-7510** with any questions.

- 1 Step 1: Your Kitchen Shape**  
Draw your kitchen in the shape of a box showing all the walls that you believe will have cabinetry. Make sure you include any and all major structural features.
- 2 Step 2: Draw it Out**  
Mark all openings in the space (windows, doorways, etc.). Make sure you include radiators or other obstacles that may affect where cabinetry can be installed. Next, label all the openings in your space using letters. Record these letters as a key on your sketch.
- 3 Step 3: Measure**  
Now it's time to measure! Using a tape measure, measure all openings from the outside to the inside edge. Fill in the key accordingly. If you feel uncomfortable with precise measurement, feel free to round to the nearest inch. Remember, this sketch will only be used as a guideline to get started on the design process. Exact measurements will be taken by our team at a later date!

- 
- The background of the page is a light grey grid. A yellow measuring tape is stretched diagonally across the grid from the top left towards the bottom right. A yellow pencil with a pink eraser is positioned vertically on the right side of the grid, pointing downwards. The grid lines are thin and light grey.
- 4 Step 4: Your Layout**

Most of our clients already have a great idea of where their major items will go in their new space. We encourage you to sketch the ideas you have for the layout of your kitchen or bath. Feel free to include the placement of your sink, fridge and other appliances.
  - 5 Step 5: Pictures of your Space**

It will really help our team, especially our designer, if you take "before" photos of your kitchen or bath and send them to us, along with your sketch/measurements.

**All done! We told you it was easy!**

**Our contact details are available on page 5.**

Drawing does not need to be perfect or to scale - just neat. Feel free to use any paper.

## SEND YOUR INFORMATION TO US

You're almost done! The last step is to send us your sketch and photos.
